

## ***NHS: Stop privatisation, save the health service***

### *Conference notes*

*The late August announcement of a “glut” of closures and privatisations in the NHS, under the so-called “Sustainability and Transformation Plans”, amid what has been widely described as the worst financial crisis in the health service’s history.*

*That in September the British Medical Association announced plans for a renewed and escalated program of strikes by junior doctors in its campaign to defend working conditions and to defend the NHS.*

### *Conference commits Labour to*

*Wholeheartedly supporting junior doctors’ and all health workers’ fight to defend themselves and the NHS.*

*Exposing and fighting rolling privatisation and cuts, including the “Sustainability and Transformation Plans” which are driving them.*

*Rolling renationalisation of clinical, ancillary and back-office services; creating a universal, comprehensive, publicly-owned, -run and -accountable NHS, free at the point of use.*

*Nationalising social care along the same lines to create a free, public system.*

*Investing in a publicly owned and run NHS in order to make it fit for the needs of the population in the 21<sup>st</sup> century.*
